

## Non-Surgical Facelift/Energy Light Rejuvenation

Microcurrent has been used safely for decades by many medical professionals to treat a variety of health conditions. Through these applications, many cosmetic benefits were discovered. It is this technology and the ancient healing traditions of acupuncture that gave our treatments the start. Non-surgical Facelift as it is known, is non-invasive, has no downtime and causes no discomfort, swelling of the skin or redness to the skin. In fact, it has been proven to show considerable improvement in inflamed conditions such as rosacea and acne. other benefits include:

- Improves Muscle Tone
- Promotes Lymphatic Drainage/ Toxin Removal
- Lessens Pigmentation
- Reduces Wrinkles
- Lifts Eyebrows/ Plumps Lips/ Lifts Jowls

As with many cosmetic treatments , a series of visits are needed to achieve the desired results. Subsequent routine maintenance will also be part of your continued success. You and your practitioner will discuss your individual treatment needs. We look forward to helping you achieve your goals and restoring your skins youthfulness!

### **To help maximize the effectiveness of your treatment we suggest the following**

- Hydrate your body well the day of treatment as well as the night before this aids in tissue plumpness and conductivity.
- As part of the treatment, the lymphatic system is stimulated to decrease puffiness and release toxins in the skin. Occasionally previously dormant conditions are awakened so healing can occur. If you have any concerns, contact your practitioner
- This is a relaxing treatment so try not to schedule any vigorous activity afterwards.
- This treatment is performed by skilled and licensed skin care therapists with specific training in the technique and are not claiming to be acupuncturists or delivering an acupuncture treatment.

# of Treatments	Pricing	Savings	Price per session
